Grammar Tenses
Track 8

Intro
Uh, yeah, yo, grammar tenses
Grammar tenses
What you know about that? Ha
What you know about that?
Future, past, and present
Uh, yeah, yeah, yeah
Come on, let's go

Verse 1
Now let's start
with the simple present
It's the base of the basic tenses
Actions that happen now
For example
"I watch", "I rent", "I bow"
Now an action that came and went is
If we use the same sentences
"I watched", "I rented", "I bowed"
Are all past tenses now
And the future is sure enough
We know it's gonna happen
So we must say
"Will watch", "will bow", "will rent"
This is how we use the future tense
And when the action is in progress
Just add a little "I" "S"
"Is watching", "is renting", uh
It's the present continuous, hey!

Chorus
We know the time (time)
The space (space)
When the situation takes place
It's in the grammar (grammar)
Grammar (grammar)
Grammar (grammar), grammar
We know the time (time)
The space (space)
When the situation takes place
It's in the grammar (grammar)
Grammar (grammar)
Grammar (grammar)
Grammar tenses

Verse 2
And now it seems that the next six
Mix up the grammar with a nice twist
Kinda tricky
The perfect tense tends to be
It shows an action already complete
"I have watched"
The present perfect tense
The past says "had watched" instead
We know that
It happened some time ago
When the future
"Will have watched" and so
Lastly perfect progressive forms
Present, or past, and future of course
Similar to the perfect, uh
Easy to confuse
When you think you've heard it
"We have been renting"
In the present
"We had been renting"
Is a past sentence
"We will be renting"
In the future
These are
Perfect progressive tenses

Repeat Chorus

Verse 3
Uh, then you'll find a past one when
A point in time
When the actions happened
"Were watching", "were renting"
"Were bowing"
Now, we're progressing
On to an action in a time to be
In the future is a tense we need
"Will be watching", "will be bowing"
Like the end of the show, you see

Repeat Chorus
