

## AMERICA

By Bobby Susser

America, America  
America, America  
There's something we all need to know  
From Northern Maine to Potrero  
We see it on a T V show  
We hear it on the radio  
Happy together, we ought to be  
Deep down inside, we all agree  
C'mon everybody sing it out now  
One, two, three

### CHORUS:

America  
We come from every place  
America  
You've got a smiling face  
America  
We come from every place  
America  
You've got a smiling face

No matter where it is you go  
Miami Beach or Idaho  
The grass is gonna surely grow  
And that's a fact that we all know  
No other place makes me feel this way  
No other place shines from day to day  
No other place makes you wanna say  
One, two, three

### CHORUS:

Bridge:  
We've all been lucky to be here  
And we all know it's true  
The colors look so good to us in red and white and blue  
And every time that we say home  
We know that home  
Is here, oh it's here

Repeat First Verse

One, two, three
