

Galaxy by Carole Stephens ©2019

You may pass a world ball or Galaxy Balloon Ball (BearPawCreek.com), or sing the song to learn the planets' names.

The Milky Way is our galaxy

The sun is the center of our solar system

Stars and planets swirl and roam

Earth is the planet that we call home.

Yes, Earth is the planet that we call home.

Sun at the center, then comes Mercury

Venus, Earth and then there's Mars

Jupiter and Saturn, too

Uranus and then Neptune.
