## “Coral Reef” (Claudia Robin Gunn)

There is a garden  
That doesn't need watering  
Cos it's under the sea  
Down where the clownfish  
Hide in their anemones  
In the coral reef

Reef gardens grow  
Zooxanthellae they glow  
It forms a place  
For thousands upon thousand  
Lifeforms to call home

Corals are animals not plants  
Together in a coral colony  
By the light of the full moon  
Coral polyps spawn in synchrony  
Corals can also clone themselves in buds  
To start new colonies

Reef gardens grow  
Zooxanthellae they glow  
It forms a place  
For thousands upon thousand  
Lifeforms to call home  
Coral reefs take thousands  
And thousands of years to form  
So coral gardeners around the world  
Are diving and seeding the nurseries  
To keep corals living on

So here is the garden  
That doesn't need watering  
Cos it's under the sea  
It only takes sunlight  
Time and community  
To build a coral reef  
For a coral reef

Reef gardens grow  
Zooxanthellae they glow  
It forms a place  
For thousands upon thousand  
Lifeforms to call home  
Coral reefs take thousands  
And thousands of years to form  
So coral gardeners around the world  
Are diving and planting and helping  
To keep corals living on
