

15. Right Here (Identifying Bones)

Words and music by Jack Hartmann Copyright 2007

Where is your skull? Right here!
Where are your ribs? Right here!
Where is your mandible? Right here!
Where is your clavicle? Right here!

Right here, in my whole body there are 206 bones so I'm not all floppy
Right here, on top of my neck, my skull is like a helmet
My brain it protects

Where is your humerus? Right here!
Where is your radius? Right here!
Where are your carpals? Right here!
Where are your phalanges? Right here!

Right here!
In my whole body there are 206 bones so I'm not all floppy!
Right here!
On my two hands, there's 52 bones so they can do all they can

Where is your backbone? Right here!
Where is your pelvis? Right here!
Where is your femur? Right here!
Where is your tibia? Right here!

Right here!
In my whole body, there are 206 bones so I'm not all floppy!
Right here!
On top of my neck, my skull is like a helmet
My brain it protects

Where is your funny bone? Right here!
