

Sunbeam Energy

©2011 Rocky Mountain Music

[V1]

In the land of the free
In the home of the brave
Lives a gal named McGee
By the old willow tree
Right next to a cave
And you probably think
McGee's home is old school
But this home of McGee
Uses sun energy
And no fossil fuel
I think that is so cool

[V2]

On the roof of her home
Is a solar array
Which collects every one
Of the beams of the sun
In the light of the day
Like a black metal sheet
That creates all her heat
And electricity
"Fossil fuel energy is so last century"
Are the words of McGee

[Chorus]

The sunbeam, sunbeam, sunbeam
Shining down
The solar rays will fuel the home of Old McGee
The sunbeam, sunbeam, sunbeam
Shining down
We all could be like Old McGee
Fossil free with sunbeam energy

[Bridge]

Some say McGee is old and crazy
Some say she's a fool
But we see McGee much differently
A dreamer of sustainability
Hey McGee, do ya think that we
Could live without fossil fuel
"It's highly possible, even potentially probable

For we know that glow of the sun is very
powerful"

[V3]

Take a trip to her home
She will make you some tea
And you will hear McGee say
That we all will one day
Have sun energy
It's the future of heat
And electricity
"Fossil fuel energy is so last century"
Says old lady McGee
And I think I agree

[Chorus]

The sunbeam, sunbeam, sunbeam
Shining down
The solar rays will fuel the home of Old McGee
The sunbeam, sunbeam, sunbeam
Shining down
We all could be like Old McGee
He and she and me and we
Wait and see how happily
The world will be with sunbeam energy
Fossil free with sunbeam energy
Just like old McGee
"That's me!"
