

The Space Rock

© Jim Thorne, 2016 (key of Am)

Intro: Am – G – Am – G

Am E Am F G
The dinosaurs were living in a world so lush and green
C Em E
Out in space a rock was heading toward the earth unseen
Am E Am F G
And when it hit the planet, things would never be the same
C E Am – G – Am – G
Life would have to start again from fragments that remained

C
Who can help the earth today
G
By moving rocks in space?
Am
Maybe kids could fly their ships
E Am
Before it gets too late

When Laura found an asteroid would hit the earth someday
She and Tommy took their ships to find it on the way
They used the pull of Jupiter to help them get there fast
Then they had to slow themselves to keep from going past

Chorus

As Tommy steered his rocket to begin a rendezvous
Laura worked on finding just the spot to land there too
They made their preparations to put down some shiny paint
Then the sun would do the work as people had to wait

Chorus

As days and months and years went by the rock began to move
Shifting in its orbit with a change so slow and smooth
It never hit the earth because the kids had done their best
All of human life was spared, along with all the rest

Chorus
