

A Space Ballet

© Jim Thorne, 2016 (key of G)

When people living on the earth
Needed room to grow
They searched across the universe
For a place to go
They looked for places to live in space

Chorus:

They built a colony out in space to be
A place to live and play
They spun it gradually, making gravity
Just like a space ballet

When they were searching out in space
They would try to find
A spot where things would stay in place
For the longest time
They found a place they could live in space

Chorus

So after finding a place to live
Many ships were flown
They made a habitat that they filled
Making it a home
They started going to live in space

Chorus

And when the city in space was done
Tommy turned it round
As Laura pushed on the other side
Things stayed on the ground
They made a miniature world in space

Chorus
