

Body Sounds  
words and music by Lullatone

Let's use our bodies to make some sounds  
All we gotta do is play around  
Like when you stomp on the ground  
Or give your fist a little pound  
Let's listen and see what we've found just monkeying around  
[Ok, so stomp your feet like this  
Sounds good, and get your fist in your other hand  
Alright]

Give your tongue a little click  
Does it sound just like the tick  
Or the tock of a clock  
Or a door that's just been knocked  
Or maybe a horse that's going for a walk that forgot his socks, what?!  
[horse sounds]

Hey you got a nice belly bongo  
It likes to go, wherever you go  
Watch it wiggle when you give it a pound  
And watch it jiggle when you give it a laugh  
Alright alright, that's enough of that, let's give it a tap  
[tap]

Well, do you know about scat?  
I can tell you a little bit about that  
It's a funny way to sing where you don't say anything  
You just make sounds with your mouth and it's awesome  
Ok here...  
[scat]

Alright,  
Let's put them all together now  
And we'll see just how they sound  
I'm sure it will be profound  
And all your friends you will astound  
At all the sounds that you found just playing around
