

The Spaceship That Fell In My Backyard- Reprise

Got my foil hat on and I'm ready to travel,
All of life's mysteries are set to unravel
When I board the spaceship that fell in my backyard

"Greetings earthling," that's what they'll say, the doors will close and we'll jet away
When I board the spaceship that fell in my backyard

The neon lights, the smoke that's slowly rising
I'm set to go beyond the blue horizon
My friends will have to wait 'til later,
They'll know I've gone when they see the crater the spaceship left
that fell in my backyard

We'll set out through the starry sky
Watch Mars and Jupiter go by
When I board the spaceship that fell in my backyard

A new girlfriend from another planet, her name is URR, but I'll call her Janet when I
board the spaceship that fell in my backyard.

Repeat Chorus
